Tactical Fiber Optic Cable

Mohawk's tactical fiber is designed to perform at the highest standards, even when exposed to the elements and tight bend radiuses. Manufactured with tight buffered fibers, aramid yarns and a polyurethane outer jacket, these cables are resilient, abrasion and cut-thru resistant, and resistant to crushing.

In addition, the cables are smaller and lighter than most traditional cables used in these applications. This results in a smaller bend radius capability and improved flexibility in a broad range of outdoor temperatures and weather conditions.

Mohawk's newly redesigned tactical fiber cable is designed to military mechanical standards to offer a ruggedized construction that will stand up to harsh field abuse. Constructed for tight bend tolerances, maximum performance and reliability, Mohawk's tactical fiber cable is a sure fit in today's harsh applications. This re-deployable cable is ideal for use in broadcast applications, military communications, mining and industrial applications.

Mohawk also offers its tactical fiber in factory pre-terminated assemblies. SC/ST/LC/FC fan-outs or SMPTE 358 hermaphroditic connectors are available in custom lengths. Assemblies on re-deployable reels can also be purchased from Mohawk. Please consult the factory at 1-800-422-9961 for more information or visit our website at www.mohawk-cable.com.

Frequently Asked Questions about Tactical Fiber Optic Cable

Is Mohawk's tactical fiber cable military rated?

No, Mohawk's tactical fiber cable is not currently military approved. We manufacture the cable to the current military mechanical specifications and it is completely suitable for all communication applications.

Does Mohawk offer preterminated assemblies using tactical fiber cable?

Yes, Mohawk can manufacture preterminated assemblies to any specified length. SC/ST/FC/LC fan-outs are available, as well as hermaphroditic connectors specified in the SMPTE 358 standard.

What fiber counts and glass types are tactical fiber cable available in?

Mohawk can offer fiber counts up to 12 fibers and in every available glass type; single-mode, 62.5/125 multimode and 50/125 multimode.

Does Mohawk offer re-deployable reels?

Yes, Mohawk currently carries three sizes of re-deployable reels to accommodate various sizes and lengths of cables.

Is Mohawk's tactical fiber cable waterproof?

No, it is not waterproof, but it is water-resistant. It is not suitable for direct burial or burial in a pipe.

What literature is available?

FAQ's, New Product Bulletin, Data Sheet and Sample Packages.

For product literature or samples, contact Denise Markert at 978-728-5233 or denise.markert@mohawk-cable.com.

For additional product information, please contact your Inside Sales Representative at 800-422-9961.

For technical support, contact Joe Barry at 978-728-5237 or joe.barry@mohawk-cable.com.
